

COVID-19 VACCINE

Protect yourself, your loved ones, and your community. Get immunized when it's your turn!

Questions? Talk to your doctor about the vaccine and your health, especially if you are pregnant, breastfeeding, or have a chronic condition.

The vaccines are:

SAFE

- **Canada has a rigorous vaccine review process**
- Independent scientists reviewed all the data before approval
- Monitoring their safety is ongoing nationally and globally

EFFECTIVE

- **Protection up to 95% once fully immunized**
- You may need two doses to have the best protection
- Most side effects are mild

FREE

- **Available to anyone living in Canada** (no cost in 2021)
- Distribution is happening in phases to manage supply
- Alberta's rollout plan guides distribution in our province

Please continue to follow public health measures even if you've had the vaccine.
